

GLOSSARY

CLASSIC CAR: an old type of car, usually one that is no longer produced and that people like to own because it looks very stylish or has special features.

GREENHOUSE GASES: The gases in the atmosphere act similar to the glass in a greenhouse: they trap the sun's heat and prevent it from escaping into space, thus causing global warming. The greenhouse effect causes the earth's surface temperature to be higher than it would be if there were no greenhouse gases in the atmosphere, allowing life on the planet. Many greenhouse gases occur naturally in the atmosphere. However, human activity contributes to its accumulation and increases global warming.

INDUSTRIAL HERITAGE: According to the Nizhny Tagil charter, industrial heritage consists of the remains of industrial culture that are of historical, technological, social, architectural or scientific value.

GLOSSARY

INTERMODALITY: Transportation by more than one form of carrier during a single journey.

PARIS AGREEMENT: The Paris Agreement is a international treaty on climate change. It was adopted by 196 Parties at the UN Climate Change Conference (COP21) in Paris, France, on 12 December 2015.

REGENERATIVE TOURISM: The term has introduced a new way of thinking about tourism, which in some ways surpasses concepts such as sustainable or responsible tourism: while these two focus on reducing the negative impact of tourism on places, regenerative tourism instead aims to generate value, to contribute to environmental, economic, and social well-being.

RESPONSIBLE TOURISM: Aims to make places better for both tourists and residents, highlights the need to take responsibility for the impact of tourism activity.

GLOSSARY

SLOW TOURISM: Slow tourism is a way of travel that is experience-centered, slow, in-depth, and allows for deep immersion and knowledge of the destination.

SUSTAINABLE TOURISM: Sustainable tourism aims to minimize the negative effects and maximize the positive effects of tourism on the environment, society and the economy.
